

W. Andrew Barr

Center for the Advanced Study of Human Paleobiology
Department of Anthropology
The George Washington University

800 22nd St NW, Suite 6000
Washington, DC 20052
wabarr@gmail.com - (202) 994-3213

Education

- 2014 University of Texas at Austin. Ph.D., Anthropology. *The Paleoenvironments of Early Hominins in the Omo Shungura Formation (Plio-Pleistocene, Ethiopia): Synthesizing Multiple Lines of Evidence Using Phylogenetic Ecomorphology.*
- 2008 University of Texas at Austin. M.A., Anthropology.
- 2005 Tulane University. B.S., Anthropology and French.

Employment Experience

- 2016 - Present Visiting Assistant Professor. Center for the Advanced Study of Human Paleobiology. Department of Anthropology. The George Washington University.
- 2014 - 2016 Postdoctoral Scientist. Center for the Advanced Study of Human Paleobiology. Department of Anthropology. The George Washington University. Advisor: Bernard Wood.
- 2006 - 2014 Teaching Assistant and Graduate Research Assistant. The University of Texas at Austin.

Fieldwork Experience

- 2014 - Present Mille-Logya Research Project, Afar Region, Ethiopia (Plio-Pleistocene). My fieldwork at MLP seeks to discover new evidence of the morphology and environmental context of earliest genus *Homo*
- 2010 - Present Dikika Research Project, Afar Region, Ethiopia. My fieldwork at Dikika aims to understand paleoenvironmental change through the Hadar Formation, and to document the frequency and nature of bone surface modifications at this site which preserves the oldest reported evidence of stone-tool modified bones
- 2016 - Present Koobi-Fora Research and Training Program, East Turkana, Kenya. My fieldwork seeks to document the variability of hominin habitats in the Turkana Basin from the Pliocene through the Pleistocene, and to understand how this variability influenced human behavior and evolution.
- 2013 - 2014 Great Divide Basin Project, Wyoming. Collected primate and mammalian fossils from Eocene sediments, and prospected for new localities.
- 2007, 2008, 2010 Dalquest Research Site, Big Bend Region, Texas. Surface collected primate and mammalian fossils in the Devil's Graveyard Formation. (Eocene: Late Uintan).
- 2009 Contrebandiers Cave, Temara, Morocco. Excavated site preserving Middle Stone Age archaeology (Aterian) and hominin remains. Performed systematic analysis of rodent fauna.

Collaborative Research Affiliations

2015 - Present	External Member. Evolution of Terrestrial Ecosystems Working Group. National Museum of Natural History.
2014 - Present	Research Associate. Department of Paleobiology. National Museum of Natural History.
2012 - Present	Research Associate and Software Developer. PaleoCore Project.

Research Grants and Fellowships

In Review	Collaborative Proposal: IRES Track I: Biological and behavioral adaptations to ecological variability through time in the Turkana Basin (Kenya). Role: Co-PI. \$276,089.
2013	Named Continuing Fellowship - University of Texas at Austin Graduate School. \$29,000.
2012	Dissertation Fieldwork Grant - Wenner-Gren Foundation. \$13,317.
2007	Graduate Research Fellowship - National Science Foundation. \$90,000.
2007	Liberal Arts Graduate Research Fellowship - University of Texas at Austin. \$1,800.

Peer-Reviewed Publications

Courses Taught

- Introduction to Biological Anthropology*. ANTH 1001. Undergraduate survey of the field of biological anthropology. The George Washington University, Anthropology. Taught Fall 2016, Spring 2017.
- Analytical Methods in Evolutionary Anthropology*. ANTH 6413. I designed this graduate course covering applied statistical methods (e.g, regression, ANOVA and related techniques, categorical data analysis, resampling approaches) and the R statistical programming language. This is a required course for the Hominid Paleobiology PhD program. The George Washington University, Anthropology. Taught Spring 2015, Fall 2016.
- Climate Change and Human Evolution*. ANTH 3491. I designed this upper level undergraduate course covering changes in global climate through evolutionary time and the impacts on evolution, with an emphasis on humans. The George Washington University, Anthropology. Taught Spring 2016, Spring 2017.
- Public Understanding of Science*. HOMP 8302. Graduate course in which students complete semester-long public service internships. Student projects target underserved Washington, DC-area public schools and general audiences at public museums with a goal of increasing scientific literacy and creating interest in scientific careers. The George Washington University, Anthropology. Taught Spring 2016.
- GIS and Remote Sensing for Archaeology and Paleontology*. ANT 391 / GRG 396. Teaching Assistant. University of Texas at Austin, Anthropology. 2010.
- Human Variation*. ANT 394C. Teaching Assistant. University of Texas at Austin, Anthropology. 2009.
- Introduction to Physical Anthropology*. ANT 301. Teaching Assistant. University of Texas at Austin, Anthropology. 2006, 2007, 2010, 2011, 2012.

Public Outreach and Science Communication

- 2016 - Present [Faces of Fieldwork](#) - I believe that public engagement with science increases when people understand who we are and why we do what we do. I launched this outreach website to magnify the reach of the amazing fieldwork being done by diverse early career scientists. So far, the project has highlighted the work of 83 fieldworkers (57 women, 26 men, including many masters and PhD students). In 2017, this website had 6475 distinct visitors from across the world.
- 2017 *Survivors: What Fossils Tell Us About the Past and Future*. I engaged with members of the general public at the National Museum of Natural History, to answer questions about extinction, and the future of evolution in light of a changing climate.
- 2014-2015 Volunteer, Explore UT - University wide K-12 educational open house. Organized and implemented the activity "Leaping Lemurs of Madagascar" on locomotion and conservation of lemurs.
